Comment. As compared with the last reported status of 8 December, coal stocks again decreased by 17,290 tons to a total of 161,477 tons. Hard coal stocks dropped by about 13,000 tons and amounted to only 46 percent of total coal stocks. According to the present daily coal consumption quota of 23,500 tons, including 21,580 tons for operational use and 1,940 tons for use by railroad maintenance and repair installations, total coal stocks are adequate for 6.8 days' requirements, while 16 days' requirements are the target for the winter months. The backlog of undischarged cars again increased considerably which reflects operational difficulties. The number of damaged railroad cars remained at the same level. The park of operational cars continued to be around 100,000 cars.
